Examiner's Statement of Reasons for Allowance

1. Claims 3, and 5 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention.

Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claims 3, and 5:

The present invention is directed to an antenna device.

The following is an examiner's statement of reasons for allowance:

Regarding 3, and 5, the prior art does not anticipate, nor does it suggest, the details that are claimed in the independent claims. Particularly when the claims are interpreted as argued by applicant on page 4. These details are the same as disclosed in applicant's specification. These details, as now interpreted by the examiner in view of the applicant's remarks, that are not shown in the prior art include a plurality of cables are attached to said plurality of antennas and said radio terminal, and are bundled to pass through a through hole in said three-dimensional joint, and wherein the three-dimensional joint comprises: a pivot portion projecting from said movable case, a spherical portion provided on an end of said pivot portion, and a sphere receiving portion provided in said base case, to which said spherical portion fits so as to rotate freely, wherein said through hole penetrates through said pivot portion and said spherical portion to open an inside of said movable case to an inside of the base case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
